MEMORANDUM

SUBJECT: Air Transportation, Planning Manual, Vol. III

Reviewed by [REDACTED] S/TR, ORR 25X1A

Of the 38 pages of text, the first 19½ pages have to do with the manufacture (rather than the operation in transport service) of airplanes and would appear to be appropriate for review by D/I. The next 10½ pages, through page 30, are descriptive of the parts of an airplane.

The material directly relating to sabotage is contained in pages 31-38. As to the material S/TR has no comment other than that it looks to be comprehensive and adequate.
